

Functional Programming

Project Title Scala Project

Group Name: Group 11

d'AMERVAL, Leo

IG5_Polytech

November 19, 2023

About the Project

■ Your Specific Contribution:

- Creating the relationship between MongoDB and Neo4j

■ Methodology or Approach:

- Creating a scala program that setup up all the dependencies
- Fetching the data (json collection) from Atlas
- Transform (with cypher queries)
- Pushing data into Neo4j

Challenges and Learning

■ Challenges Faced and Their Resolutions:

- To face all the Atlas connections problems and
- Assemble every part of the project

■ Learning Gained:

- Have everything setup before the project start

■ Future Improvements:

- I should improve in being better
