Functional Programming with Scala

Project Title: Scala Project

Group Name: Group 11

d'AMERVAL, Léo

IG5_Polytech

November 25, 2024

About the Project

- **Your Specific Contribution:**
  - Creating the relationship between MongoDB Atlas and Neo4j

- **Methodology or Approach:**
  - Creating a scala program that setup up all the endpoints (Atlas and Neo4j)
  - Fetching the data (json collection) from Atlas
  - Transform the data to match the Neo4j format
  - Pushing data into Neo4j (with cypher queries)

Challenges and Learning

- **Challenges Faced and Their Resolutions:**
  - To face all the Atlas connections problems and fetch the data from it
  - Assemble every part of the project

- **Learning Gained:**
  - Learned the importance of thoroughly preparing and testing all setups before beginning development.

- **Future Improvements:**
  - Improve personal project management and planning skills.
